

NATIONAL AVIARY LIFTOFF!

Student's Name

Date

	Developing	Demonstrated	Applied	Score
Student understands that birds have a light body structure				
Materials used in project parallel the body structure of a bird				
Bird replicas reflect the concept that body structure determines movement/flight				
Replicas reflect the concept that birds have hollow bones, feathers and do not have teeth				
Student worked independently on project, utilizing National Aviary website and/or other resources to obtain a prototype				
Bird design reflects experimentation to obtain mobile, airworthy model
