

new beaks at the Aviary

Hatched in October and November: Pygmy Falcons (2 clutches), Sun Bittern, Pied Imperial Pigeon

Photos by Daniel V. Klein

Above: Pygmy Falcon chick less than a week old. Inset: Just 12 weeks later, the chick has attained adult size and appearance.

SUMMER Flight Camp

Ever wonder what it takes to fly high in the sky? What better place than the **National Aviary** to answer that question and more during our 2006 Flight Camp!

We will explore the mysteries of natural and artificial flight in collaboration with the **Carnegie Science Center**, **Pittsburgh Institute of Aeronautics**, **Pittsburgh Zoo** and **PPG Aquarium** and **Challenger Learning Center**. Learn how planes are designed and what aeronautical engineers have learned about flight from birds. Explore and test all the cool principles of physics that are needed to fly in the sky and even in space. One day is spent at each of the collaborating sites.

To register, please call
412-323-7235 x 209.

Dates:

Ages 6-8 Mon.-Fri., July 24 - 28
Ages 9-11 Mon.-Fri., July 31 - August 4
Ages 12-14 Mon.-Fri., August 7 - 11

Upcoming Aviary event...

Feathered Jewels Gala

friday, september 8

Night in the Tropics

saturday, august 19
